Shell Chemicals Deer Park Plant Tour

In lieu of a regular meeting, the Deer Park Community Advisory Council gathered at the Shell Deer Park administration building, boarded a bus and took a driving tour of the unit where the May 5th fire occurred. After the tour, a brief overview of the site and an update on the rebuilding of the unit where the fire occurred were provided by Shell Deer Park General Manager Nate Levin and Production Manager Rob Perrotta.

DPCAC's October 23rd meeting topic is the Annual Report on Emission from DPCAC Plants. Visitors are welcome! For an invitation, contact info@deerparkcac.org.
